Student Wellness Check-In

Wellness Check-In

As part of our updated health and safety protocols, all of our families are required to complete an online Daily Wellness Check-In for any of their Kamehameha Schools students that may be participating in onsite learning or other activities. This wellness check-in is a key step in ensuring we are each doing our part to keep our school community safe.

The check-in is **NOT REQUIRED** to be filled out if the child is not physically onsite at school or participating in onsite learning or other activities.

Additional information and frequently asked questions are included below.

How can I access the online check-in?

The Wellness Check-In can be accessed via this weblink: <http://go.ksbe.edu/studentwellness>
Additionally, here is a link to bookmark this Wellness Check-In to your phone, iPad and/or computer: [Shortcut to bookmark the Wellness Check-In.](#)

When should the online check-in be completed?

The check-in must be completed prior to arrival of your student at a KS school or a KS activity. This check-in asks you to report if your student is experiencing any symptoms or illness and other questions that address whether a student can report to campus and/or participate in a KS activity.

What will happen if I answer yes to any of the questions on the online check-in?

If you answer “yes” to any of the questions, your student will not be cleared to attend school or a KS activity and must remain at home.

Additionally, the COVID-19 Response team will be alerted and will partner with the respective education administrators on next steps which may include following up directly with parents and guardians to assess the potential exposure and provide additional support and direction

What will happen if my child arrives at campus and has not completed the wellness check-in?

If the parent/guardian does not complete the wellness check-in for their child prior to the onsite activity the child will be asked to return home and a parent/guardian will be contacted.

How will completion of the online check-in be monitored or verified?

All students will be required to show their clearance passes (aka “happy face” email confirmation) to a KS staff member to participate in onsite learning or other activities.

What questions will be asked on the form?

In order to ensure a safe environment for all our keiki and staff members and limit the spread of COVID-19 on our KS sites we are asking all staff or students to stay home if the following circumstance below apply.

Given the rapidly evolving nature of COVID-19 these questions may be updated or refined periodically.

Wellness Check-In Question	Why?
<p>1. Has the student tested positive for the COVID-19 active virus in the past 10 days?</p>	<p>Any students who have tested positive for an active virus of COVID-19 should stay home until the Department of Health or their medical provider provides a note to release the student from isolation. The COVID-19 Response will advise when returning onsite will be possible.</p>
<p>2. Within the past 14 days, has the Department of Health, a medical professional, or the KS COVID-19 Response Team asked the student to self-monitor, self-isolate, or self-quarantine because of concerns about COVID-19 infection?</p>	<p>Students that have been instructed to quarantine due to an exposure to a positive COVID-19 individual should stay home from school and should not return until cleared by COVID-19 Response Team.</p>
<p>3. Has the student been in close contact* with someone who has tested positive for an active case of COVID-19? <i>Close contact is considered being within 6 feet of an infected person for at least 15 minutes or more over a 24-hour period starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to specimen collection) until the patient is isolated.</i></p>	<p>Students that have been in close contact with someone who has tested positive for COVID-19 need to quarantine for 14 days from the last date of contact with the close contact.</p> <p>The COVID-19 response team, in partnership with DOH or the student's medical provider will advise when the student may return onsite.</p>
<p>4. Does the student reside in the same household as someone who is in quarantine due to a COVID-19 exposure (not including travel related quarantine) and will the student continue to be in close contact* with this individual during their quarantine period? <i>Close contact is considered being within 6 feet for at least 15 minutes or more over a 24-hour period.</i></p>	<p>Students that cannot remain physically distanced from a household member that is in quarantine due to exposure to a positive COVID-19 individual should remain at home for the duration of this individuals quarantine and monitor symptoms.</p> <p>The COVID-19 response team should be contacted to advise when the student is able to return onsite.</p>
<p>5. Is the student awaiting COVID-19 test results, or does the student reside in the same household as someone awaiting COVID-19 test result that you are in close contact with*? <i>See definition of close contact above in #4.</i> <i>This does not apply to individuals who have household members that routinely get tested as part of their job or household members that are awaiting test results due to return from travel.</i></p>	<p>Students awaiting COVID-19 test results or that are living with someone awaiting results need to stay home until test results are received. This will help reduce the number of close contacts the student could expose if the student tests positive.</p>
<p>6. In the last 10 days, has the student completed any INTERISLAND or OUT OF STATE TRAVEL and their return onsite has not been approved/cleared by a KS supervisor/KS campus designee?</p>	<p>Students who travel out-of-state should not return on site until they receive KS approval.</p> <p>Refer to the KS Travel Policy Here: https://www.ksbe.edu/back_to_school/kapalama/student_travel/</p>
<p>7. Do any of the following symptoms apply to you that are NOT caused by a chronic medical condition? <i>New symptoms of coughing, difficulty breathing, fever or chills, sore throat, muscle or body aches, loss of smell or taste, headache, congestion or runny nose, fatigue, nausea, vomiting, diarrhea and abdominal pain.</i></p>	<p>Students who are sick should stay home and contact the attendance office.</p>
